

INVESTOR'S BRIEF

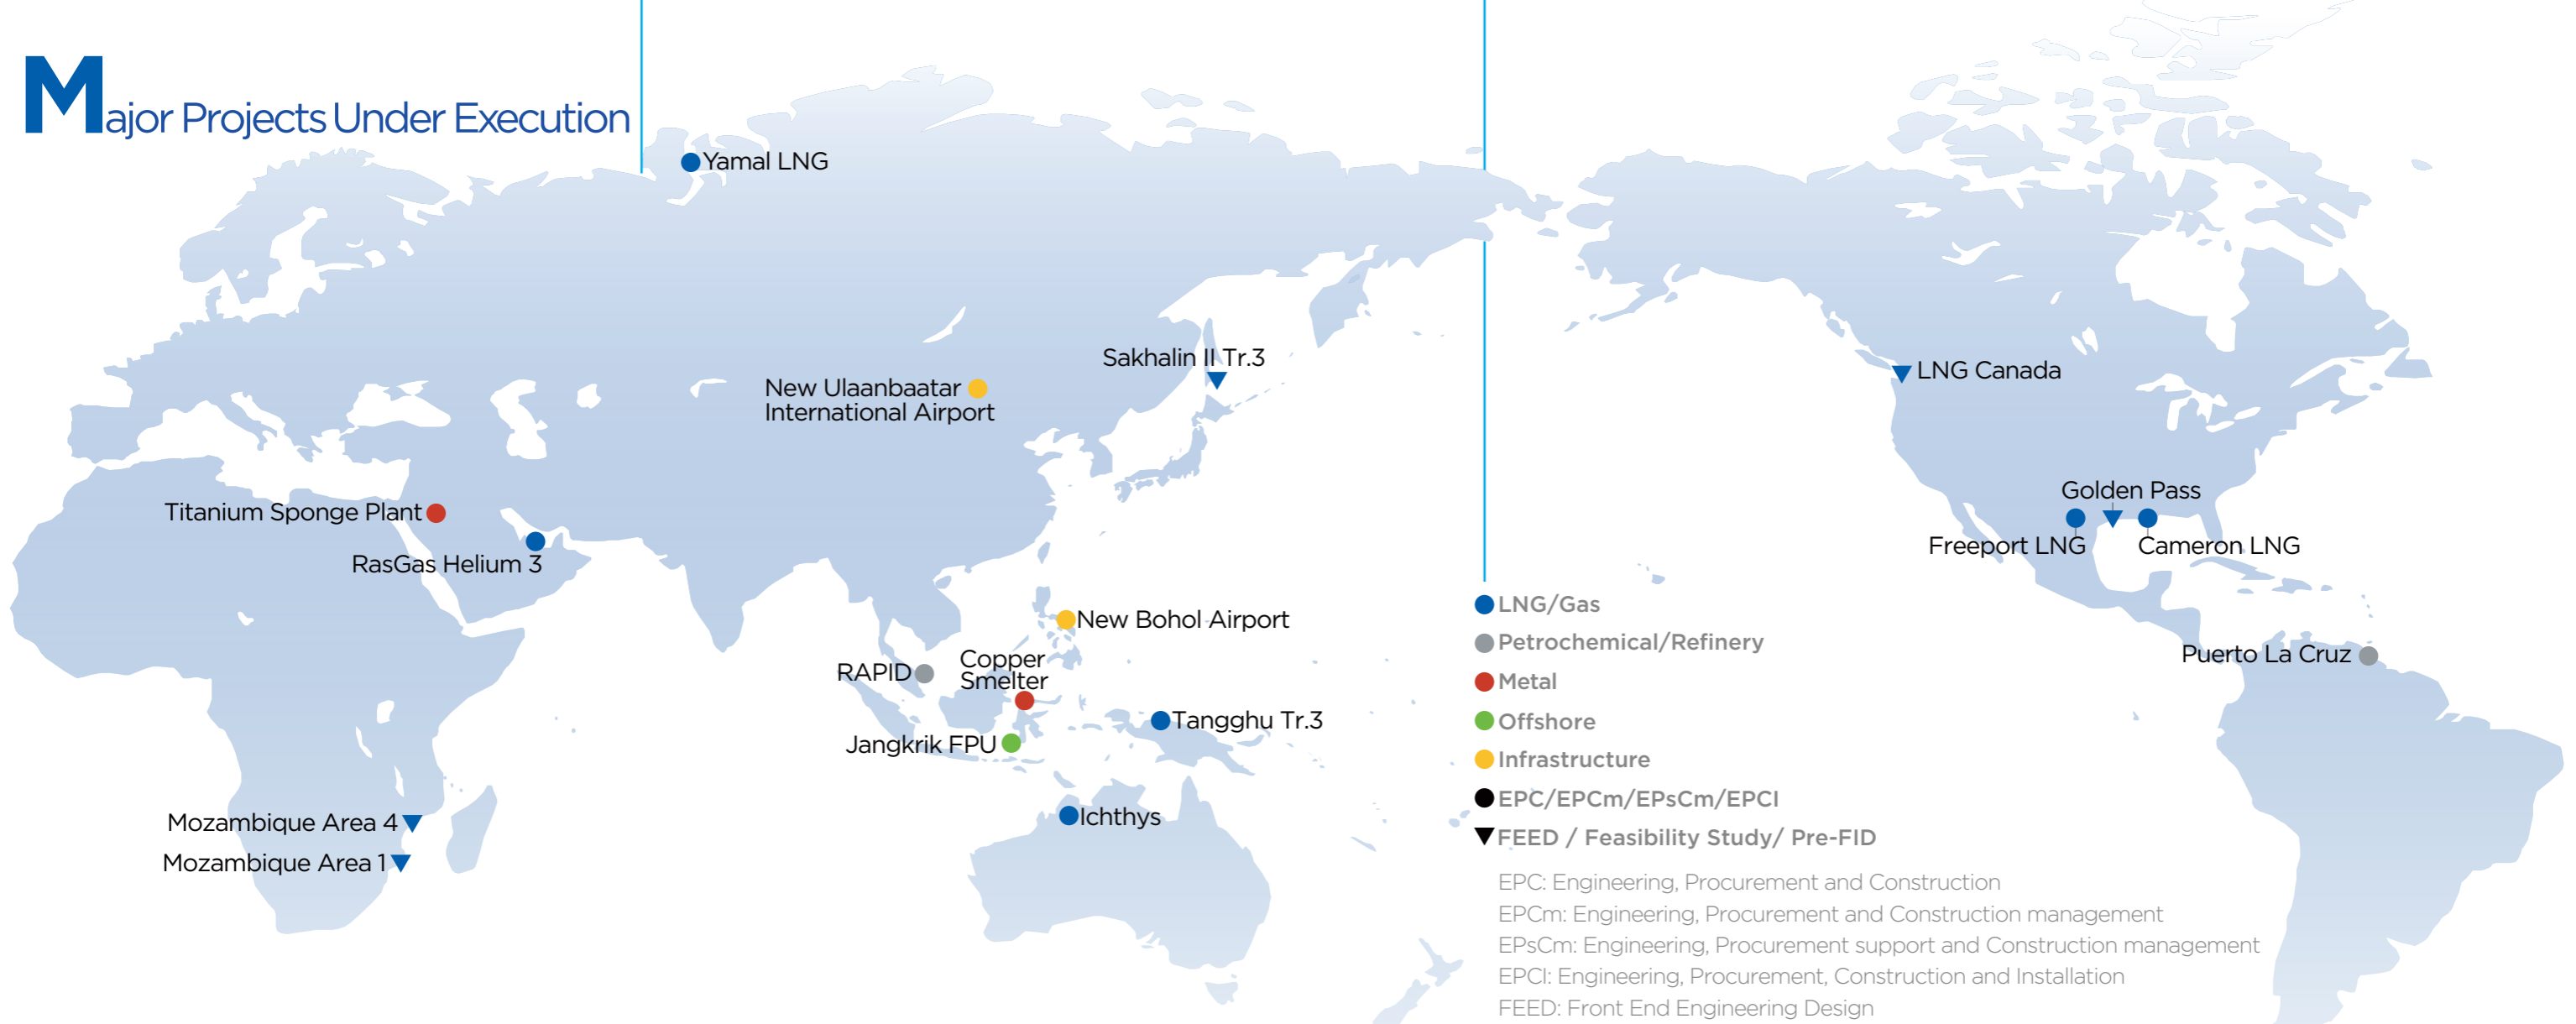

2017

Our corporate philosophy is to contribute to the development of a sustainable society by advancing our business toward the harmonization of energy and the environment. As an integrated engineering company, we make full use of our collective wisdom and carefully developed technology to achieve this vision.

SPERA HYDROGEN

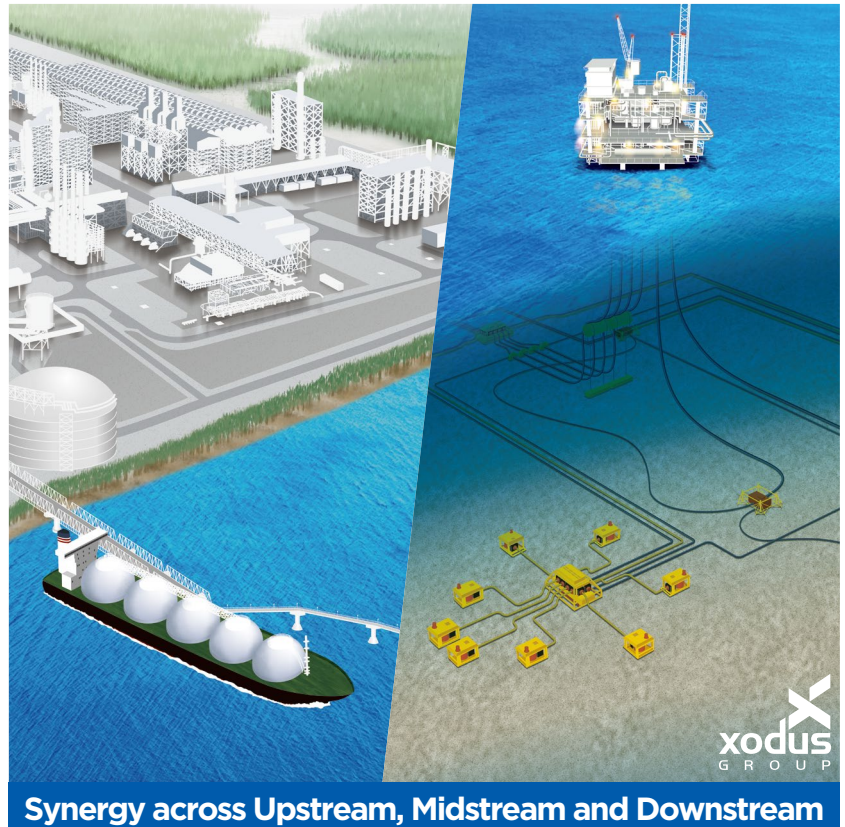

Hydrogen, once considered a distant dream of an energy, has become a reality, and Chiyoda Corporation has made it remarkably easy to use. Our innovative technologies enable hydrogen to be liquefied and consequently transported at ambient temperature and pressure. We named this liquid "SPERA Hydrogen." Able to survive transportation over long distances and storage over long periods of time (almost unthinkable before), this "hydrogen of hope" is highly safe and stable. It will overturn the conventional wisdom regarding hydrogen.

New Business

Chiyoda Group has established an organization to provide a wide range of services including Concept Selection, Pre-FEED, FEED, EPCI (Engineering, Procurement, Construction and Installation), as well as Operation & Maintenance services relating to offshore oil and gas field development projects, to maximize synergies from upstream to mid & downstream business operations.

Synergy across Upstream, Midstream and Downstream
