Chiyoda, McDermott and Zachry Group Introduce Feed Gas to Train 1 at Freeport LNG

Chiyoda International Corporation (CIC), a U.S. based wholly-owned subsidiary of Chiyoda Corporation (TSE: 6366; ISIN: JP3528600004) along with its partners, McDermott International, Inc. and Zachry Group announced today that Train 1 of the Freeport LNG Liquefaction project on Quintana Island in Freeport, Texas in the US, has reached the final commissioning stage. This includes the introduction of feed gas into Train 1 of the natural gas liquefaction and LNG export facility.

Since 2014, CIC along with McDermott and Zachry Group has provided engineering, procurement and facility construction as well as commissioning and initial operations for the project. The project includes three pre-treatment trains, a liquefaction facility with three trains, a second loading berth and a 165,000 m³ full containment LNG storage tank. Once Train 1 is fully operational, it will have the capacity to produce more than 5 million tons of LNG per year. With the largest electric motor driven refrigeration compressors, the Freeport LNG facility will significantly improve the energy export capabilities in the U.S.,

About Chiyoda

Chiyoda Corporation, headquartered in Yokohama, Japan provides services in the fields of engineering, procurement and construction on a global basis for petroleum refineries, petrochemical complexes, other hydrocarbon or industrial plants, particularly LNG plants in the USA, South East Asia, the Oceania regions, the Middle East and Russia.
