

Participation in the FC EXPO 2021 – 17th Int’l Hydrogen & Fuel Cell Expo

We sincerely appreciate for the continuous business with Chiyoda Corporation. We will be participating in the FC EXPO 2021 at Tokyo Big Sight, scheduled for 10:00-17:00, March 3-5, 2021.

Under our corporate philosophy "Energy and Environment in Harmony", we have strengthened our efforts in the environment and new energy fields such as solar power, offshore wind power, storage batteries, carbon recycling, energy management, and hydrogen. As part of the progress, by deepening the knowledge we have fostered, we will develop the hydrogen supply chain business toward the realization of a hydrogen society that will be the foundation for the realization of carbon neutrality in 2050.

Due to the impact of the new coronavirus infection, there may be some concerns regarding your visit, but the organizer has informed us that by thoroughly implementing Japanese government and the exhibition industry guidelines the trade show will be held as scheduled. In addition to exhibiting at the booth, online visit service is also available for your consideration as well.

We hope that you will take this opportunity to consider participating in the exhibition.
