

PRESS RELEASE

5 July 2021

Appointment to the Managing Board of the Japan Hydrogen Association (JH2A)

Chiyoda Corporation (Chiyoda) is pleased to announce its appointment as a managing board member of the Japan Hydrogen Association (JH2A), an open and cross-industry organization with a comprehensive understanding of the hydrogen supply chain, at a general assembly held on 25 May 2021. Established on 7 December 2020 to facilitate global member collaboration, JH2A aims to accelerate a hydrogen-based society through the social implementation of hydrogen projects.

As a fully integrated engineering organization with global expertise across a broad range of industries, Chiyoda contributes to the pursuit of net zero carbon emissions through a hydrogen based society by offering cross-discipline technical recommendations and solutions without hydrogen carrier limitations.

Chiyoda exhibited its 'in-house' SPERA hydrogen technology by successfully completing the world's first international hydrogen supply chain demonstration and is committed to realizing a hydrogen-based society in Japan as soon as practicable by proactively supporting the government's Basic Energy Plan through JH2A activities.

As of April 2021, JH2A's total membership of 195 member companies/organizations included: 22 executive member companies, 109 general member companies, 13 supporting member companies and special members comprising 33 local governments, 5 universities and 13 organizations.
