Chiyoda Awarded Feasibility Study of CO₂ capture / liquefaction plants by J-POWER

Chiyoda Corporation (Chiyoda) is pleased to announce that it has been awarded a Feasibility Study for CO₂ capture / liquefaction plants by the Electric Power Development Co.,Ltd (J-POWER).

Chiyoda's scope is shown in Figure 1 below and will include the design of a CO₂ capture plant, liquefaction plant and utility facility.

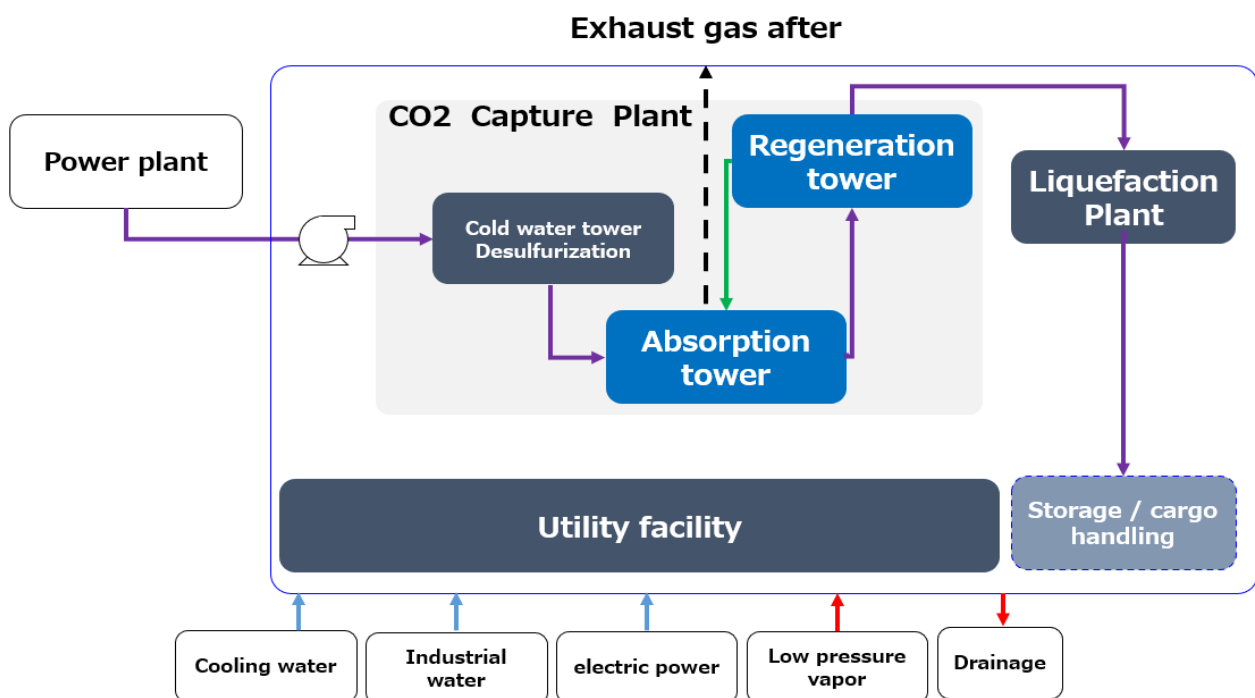

Figure 1: Chiyoda's Scope

J-POWER is participating in the public call for commissioned research for a CCS project selected by the Japan Organization for Metals and Energy Security (JOGMEC), along with ENEOS Corporation and JX Nippon Oil & Gas Exploration Corporation. Chiyoda will collaborate with J-POWER by applying its CCS project experience to support their plans.

As an integrated engineering company, Chiyoda has been engaged in CCS projects, and the development of technologies to realize a carbon neutral society, around the world and will continue contributing to the development of a sustainable society in line with our management philosophy of 'Energy and Environment in Harmony'.
