Chiyoda Awarded Engineering, Procurement, Construction Management (EPCm) Service Order for the Helium 2 Project in Qatar

Chiyoda Corporation (“Chiyoda”) (TSE: 6366; ISIN: JP3528600004), Japan’s leading engineering and construction firm, today announces that RasGas Company Limited (“RasGas”) has awarded a service order to Chiyoda Almana Engineering L.L.C (“CAEL”, a subsidiary company of Chiyoda in Qatar) for the Engineering, Procurement and Construction Management (EPCm) of the Ras Laffan Natural Gas Company Limited (3) (“RL3”) Helium Extraction Unit, and utilities for the Helium 2 Project owned by RL3, Qatar Liquefied Gas Company (2), Qatar Liquefied Gas Company (3) and Qatar Liquefied Gas Company (4). This service will be carried out under the Long Term Engineering, Procurement, Construction Management (EPCm) Services Contract concluded between RasGas and CAEL in March 2009.

1. Client : RasGas Company Limited
2. Project Scope : EPCm for Helium Extraction Unit Facilities for RasGas Trains 6/7 and Helium 2 Project Utilities
3. Contract Type : Reimbursable
4. Completion : Middle of 2012

RasGas has already placed more than 50 service orders in total with CAEL based on the Long Term EPCm Services Contract, and one of those was for the FEED (Front End Engineering Design) for the RL3 Helium Extraction Unit, and utilities for the Helium 2 Project.

The new Helium extraction units, to be constructed on a vacant, ready-prepared site, will become a part of RasGas LNG Trains 6 and 7, and will extract crude helium and transport it to the Helium 2 Project Refining Unit adjacent to the existing Helium (I) facilities.

CAEL was established in 2008, principally to provide services for post-construction plant operation on small to medium sized projects and to contribute to the further growth of Qatar. Following the Long Term EPCm Services Contract award with RasGas, CAEL has been

steadily increasing its staffing level, which currently stands at 260 people, and is planning to expand its organization to 290 people by the end of this year.

Chiyoda Corporation, headquartered in Yokohama, Japan, provides services in the fields of engineering, procurement and construction on a global basis for gas processing, refineries, and other hydrocarbon or other industrial plant projects, particularly Gas Value Chain projects, in the Middle East, Russia, Africa, South East Asia, and Oceania regions.

PRESS RELEASE

September 27, 2010

Chiyoda Awarded Engineering, Procurement, and Construction Management (EPCm) Services for Qatargas Helium (II) Project

Chiyoda Corporation (“Chiyoda”) (TSE: 6366; ISIN: JP3528600004), Japan’s leading engineering and construction firm, today announces that Qatargas Operating Company Limited (“Qatargas”) has awarded a contract to Chiyoda Almana Engineering L.L.C (“CAEL”, a subsidiary company of Chiyoda in Qatar) for the Engineering, Procurement and Construction Management (EPCm) Services of the Qatargas Helium (II) project.

1. Client : Qatargas Operating Company Limited
2. Project Scope : EPCm for Helium Extraction Unit facilities for Qatargas Trains 4, 5, 6 and 7, Crude Helium interconnection line, and Crude Helium transfer line to Refining Unit.
3. Contract Type : Reimbursable
4. Completion : November 30, 2012

The existing Helium Extraction Unit facilities were constructed by Chiyoda. The new units, to be constructed on a vacant, ready-prepared site, will extract crude helium and transport it to the Helium Refining Unit in RasGas plot.

CAEL was established in 2008, principally to provide services for post-construction plant operation on small to medium sized projects and to contribute to the further growth of Qatar. CAEL has been steadily increasing its staffing level, which currently stands at 260 people, and is planning to expand its organization to 290 people by the end of this year.

Chiyoda Corporation, headquartered in Yokohama, Japan, provides services in the fields of engineering, procurement and construction on a global basis for gas processing, refineries, and other hydrocarbon or other industrial plant projects, particularly Gas Value Chain projects, in the Middle East, Russia, Africa, South East Asia, and Oceania regions.
